ABOUT

I'm Pablo, experienced Ruby Developer. I love finding new challenges and working in high performance teams.

WORK

Senior Ruby Technical Leader

Wedding Wire (3Pillar Global Contractor)

Leading a group of 10 Ruby developers to rebuild *www.projectwedding.com*

April 2012 ~ Current (1 year)

I leaded a group of 10 developers to rebuild from scratch a social network to allow brides find inspiration for their weddings. I was in charge of the architecture, managing the scrum for the entire group and driving the team to build a high quality rails/javascript application.

Also I managed a group of 3 people fully advocated to the Quality and 2 more working with the UI design.

Ruby Specialist

3Pillar Global

April 2011 ~ Current (2 years 3 months)

Working allong with the CTO and the rest of upper management to define company wide standards for ruby and web development in general. | Compiled a set of good practices. | Prepared some talks about methodology and Ruby development. | Did some R&D projects using Riak.

Ruby Technical Leader

App47 (3Pillar Global Contractor)

April 2011 ~ February 2012 (11 months)

Building a high quality pice of software to help big companies and small ISV to distribute, manage and measure their mobile apps over the air. My tasks included leadedding a team to build among others a Rails application, a Sinatra application, tune up a Mongo DB database to support high volume of data and helping the founders to build a product from zero to a sustainable business.

.Net Consultant

Hobsons (3Pillar Global Contractor)

March 2012 ~ July 2012 (5 months)

Started up the development of a big application to help universities choosing applicants to the after-graduated programs.

During these months helped to define the development methodology and best practices along with the architecture.

Ruby Architect

Canvas (3Pillar Global Contractor)

September 2011 ~ December 2011
(4 months)

Led the team to design and code the basic architecture for a product called mygocanvas then when the bases were established transitioned it to the product team and continued providing support and help with technical decisions

Senior Ruby Developer

Wireless Matrix (3Pillar Global Contractor)

December 2010 ~ April 2011 (5 months)

This product helps companies to manage their truck fleet and their drivers. My task was creating a Rails API and a complex reporting front end

Senior Framework Developer

Aplicor (3Pillar Global Contractor)

September 2010 ~ December 2011
(4 months)

Involved in the design and development of the framework on which the CRM and the ERP are based. Worked with Entity Framework, Silverlight, and various other Microsoft related technologies.
